OIT/TRIS LOGGED

MEMORANDUM FOR: Director of Information Technology

FROM: [redacted] 25X1
Chief, Telecommunications Division, MSG/OD&E

SUBJECT: Memorandum of Understanding [redacted] 25X1

1. In April of 1984, a Memorandum of Understanding was signed regarding the inter-connectivity between CISVN and the National Programs Telephone System (NPTS), (formerly the Air Force Pentagon Secure Voice Exchange). It is now time for the MOU to be updated and while most of the changes are cosmetic, there is one area that we wish to revise. [redacted] 25X1

2. Presently, NPTS subscribers calling into CISVN are blocked at CIA from extending calls outside of the CISVN. (It is my understanding that this restriction is also placed on all other interconnects, i.e., State, NSA, DIA, etc.) We would like to see this restricion modified so that NPTS subscribers calling into CISVN would be allowed access to other, selected NPTS elements. These elements provide real-time tasking and exploitation support to national programs and while NPTS has secure voice service to them, the routing path thru CISVN is more direct. Further, we wish to ensure that the most expeditious routes/paths are available to support these programs. The exchanges that we seek this service for are 21xxxx, 22xxxx, 23xxxx, 24xxxx, 25xxxx, 26xxxx. [redacted] 25X1

3. Should you require additional information regarding this request, or if you believe discussions are required, please have members of your Office contact [redacted] 25X1
on secure [redacted]

[redacted] 25X1

MEMORANDUM FOR THE RECORD

FROM: [redacted] 25X1
Chief, Field Services Division, DFG/OIT

SUBJECT: National Programs Telephone System (NPTS) Meeting

1. A meeting of the National Programs Telephone System (NPTS) Working Group was held on 6 May at the [redacted] 25X1 Discussions centered on rewrite proposals to the existing Memorandum of Understanding on the Interconnectivity of CISVN and the Air Force Pentagon Secure Voice Exchange. Of particular interest was OD&E/TCD's request to modify subparagraph III C, under POLICY, to allow for unrestricted interconnectivity between the CISVN and multiple NPTS trunks. [redacted] 25X1

2. It was stated by the OIT Working Group members, and by [redacted] of OC/CSD, that to allow this type 25X1 interconnectivity through the CISVN would set a precedent that could adversely impact on the operation of the CISVN. It was further stated that MOU's with other Government Agencies and Departments are very specific in not allowing this type of interconnectivity through the CISVN. [redacted] 25X1

3. [redacted] of OD&E/TCD stated there would be 25X1 occasions when the National Reconnaissance Office (NRO) would want to go through the CISVN to access other NRO sites as it may be more direct and timely than using the NPTS. The NRO would use their own network, the NPTS, under normal situations but look to the CISVN as a backup to NPTS or to meet

SUBJECT: National Programs Telephone System (NPTS) Meeting

operational exigencies under stress situations. They would self police their use of CISVN. OIT concerns are that NRO would use the CISVN not only during crisis situations or when their primary path was out of service, but on a normal day to day basis when NPTS was in service but busy. [redacted] 25X1

4. After further discussion it was determined that a decision on NPTS's interconnectivity with CISVN had to be made at the Office level. OD&E/TCD was advised to send a memo to the Director of OIT requesting NPTS trunking capability through CISVN. [redacted] of OIT/NBCPO will write an impact paper to provide D/OIT with the information needed to make an appropriate policy decision. [redacted] 25X1 25X1

OD&E-0258-86
07 January 1986

MEMORANDUM FOR: Deputy Director, Operations, OIT

FROM: [redacted] 25X1
Chief, Telecommunications Division, MSG/OD&E

SUBJECT: Secure Voice Interface [redacted] 25X1

REFERENCE: OD&E-1303-85 Memorandum, same subject, dated 29 November 1985

1. Subsequent to the reference, we were informed that the Air Force will be activating additional secure voice switches at other remote facilities, as part of the National Programs Telephone System (NPTS). Certain of the facilities will be connected to [redacted] 25X1 while others will be connected to either Pentagon II or other NPTS switches. Numbering for the exchanges will be 212xxx, 216xxx, 217xxx, 22xxxx, 23xxxx, 24xxxx, and 25xxxx, and routings should be as follows:

a. Calls received at Headquarters from 33xxxx thru 37xxxx or 21xxxx exchanges, for 217xxx, 22xxxx, 23xxxx, 24xxxx or 25xxxx, should be routed to the Area.

b. Calls received at Headquarters from 38xxxx for 22xxxx, 23xxxx, 24xxxx or 25xxxx, should be routed to Pentagon II.

c. Calls received at Headquarters from 33xxxx thru 38xxxx exchanges, for 21xxxx, (the exception being 217xxx which is addressed in subpara a above), should be routed to Pentagon II. [redacted] 25X1

2. As the [redacted] interconnects have already been activated, we would appreciate your accomplishing the foregoing at the earliest possible time. The point of contact for coordination at the Area is [redacted] 25X1 25X1

Declassified in Part - Sanitized Copy Approved for Release 2012/10/02 : CIA-RDP90G00993R000100160018-0

4. (OD&E/TCD EDITORIAL COMMENT: Now that the entire NPTS network is close to fruition, we believe the original statement here could be deleted or at least modified. Perhaps OD&E/TCD could be charged with monitoring all new requirements to ensure that they are in compliance with "Section III. POLICY". We would report all new interfaces to OIT. Anyway, we can discuss.)

VI. MODIFICATION OF MEMORANDUM OF UNDERSTANDING

Declassified in Part - Sanitized Copy Approved for Release 2012/10/02 : CIA-RDP90G00993R000100160018-0

Declassified in Part - Sanitized Copy Approved for Release 2012/10/02 : CIA-RDP90G00993R000100160018-0

Beginning with the title, and wherever reads "Air Force Pentagon Secure Voice Exchange (AFPSVE)", change to read "National Programs Telephone System (NPTS). This also applies to the attached "Coordinated Dial Plan."

I. BACKGROUND

A.

B. (To be updated by NPTS Personnel.)

II. PURPOSE

III. POLICY

A.

B.

C. NPTS subscribers calling into CISVN will be blocked from extending calls outside of the CISVN and NPTS nodes.

(OD&E TCD EDITORIAL COMMENT: The proposed change here is a result of interconnects being established between the Area and the NPTS. Selected NPTS nodes (CCTS-A, CCTS-B, and CCTS-C on the Coordinated Dial Plan), are involved in real-time operational support to the Area during missions, and alt-routing via CISVN would be required during any degradation to NPTS. See OD&E-0258-86, dated 07 January 1986.)

D. Calls originating from networks other than CISVN and NPTS will be blocked from accessing NPTS.

E.

IV. RESPONSIBILITIES

A.

1.
